Parents,

Greetings from Indian Abacus !

Indian Abacus-based Math and Skill development program for unborn babies, children, and Mothers and Adults. The parents also are playing a key role in the 'skill transfer' and guide the New baby and children in operating the abacus in the prescribed manner. This program is a boon to mankind since this program helps all in enhancing learning ability, Listening Skills, Concentration, Photographic memory, increasing speed, and attaining accuracy and proficiency in all subjects. obviously, as a parent, your contribution helps the unborn baby in discovering the genius within them.

Indian Abacus is a programme/workshop developed specifically for unborn babies through pregnant Mothers. As a pregnant mother's physical, mental, and emotional condition affects the development of her child, the Indian Abacus developed an intricate apparatus and Skill development program for pregnant mothers. Using this knowledge, the Indian Abacus organisation wants to help pregnant mothers enhance their awareness and maintain a healthy baby mind and emotional state. Additionally, the programme instructs her on how to deliver a brainer child and establish a prosperous future for their unborn child.

Best Wishes.
